

Never. Ever. Settle.

Why settle for an MR16 when the Hornet does so much more?

The new Amerlux Hornet LED integrated fixture for line or low voltage track systems does everything an MR16 can do, but with much better results. Tiny, precise, powerful and controllable, the Hornet harnesses and focuses the light on your subject very specifically, enhancing hospitality and retail accents as never before. A designer's dream come true, with its small size the Hornet delivers a crisp, dimmable beam of light, with consistent benchmark color and punch, minus the striations. It also offers a 10-year limited warranty that is unmatched within the lighting industry with major savings on maintenance.

To learn more about what the Amerlux Hornet can do for you, please email us at hornet@amerlux.com or visit us online at www.amerlux.com.
