AMERLUX INTRODUCES NEW LINEAR WALL GRAZER

FAIRFIELD, N.J., June 22, 2009 – With an eye toward aesthetics and architectural enhancement, Amerlux Lighting Solutions proudly introduces its new Linear Wall Grazer, a polished extruded aluminum fixture housing 8 or 12 watt LED’s per linear foot, created specifically to enhance outstanding architectural surfaces and materials.

Optically and thermally engineered, Amerlux’s recessed LED Wall Grazer features a discreet 2-inch aperture, uses high-output white LEDs, and consumes less than 12 watts per foot with visually stunning results.

“The new Wall Grazer is the perfect solution for commercial, retail and hospitality environments to enhance beautiful artwork and architecturally significant stone or brick walls,” explained Chuck Campagna, president and CEO of Amerlux Lighting Solutions.

“The Wall Grazer accomplishes this in a low-wattage with nominal heat output.”

The Wall Grazer can be mounted in most ceilings with a voltage of 120 to 277V, offering a warm color temperature of 2700k CCT. The housing of the Wall Grazer comes in 4 and 8-foot lengths standard or engineered continuous runs spanning just 5.06 inches in depth.
