

Rook X Bollard

PROJECT:

TYPE:

Features

The Rook X Bollard family takes adjustable lighting to next level. Allowing multiple Rook X Adjustable accents to be secured to a sturdy bollard creates flexibility in putting light just where needed in any outdoor environment. Several standard mounting configurations from 1 to 4 fixtures are available with both versions of the Rook X adjustable fixtures. Various optical accessories, beam shaping films or a hexcell louver can be configured at the time of order and can be changed in the field if needed.

Product Overview

Type:	Exterior Bollard Mounted System for Adjustable Accent
Wattage:	12W (per fixture)
Color Temp:	2700K, 3000K, 3500K, 4000K
CRI:	83 typ. or 90+ typ.
Dimming:	Integrated driver with 3 dimming protocols is standard (TRIAC & ELV or 0-10V), 120-277V
Operating Temp:	-40°C to +40°C

Certifications

Fixture Summary

Application:

Bollard mounted exterior accent lighting for pathways and landscape.

Luminaire Construction:

- Machined aluminum housing and die-cast knuckle assembly
- IP66 sealed optical chamber and integral driver chamber
- Flush lens prevents puddles/water deposits in upward facing applications
- 180°+ adjustability in the knuckle
- Infinitely adjustable within the vertical aiming range using tapered locking mechanism.

Optics:

- 17°, 22°, 28°, 45°, 60°, 60x20, 90x60 90x60 beam spreads are available with secondary shaping lens

Electrical:

- Integral tri-dim driver
- Input voltage 120V-277V auto-sensing
- Drive current 300mA
- Power consumption 12W

Bollard Mounting:

The column attaches to either a base plate for concrete applications or a direct burial mounting system that is suitable for landscape applications.

Bollard Mounting:

Fixture threads onto fixed bollard couplings with supplied 1/2" threaded stainless steel nipple. Coupling and fixture include set screw to lock horizontal rotation in place.

Optical Accessories:

- Hexcell Louver

Requires AL (Accessory mount lens):

- Full Glare Shield
- Half Glare Shield
- Visor Shield

Finish:

Premium quality thermoset polyester powdercoat for a durable finish.

ETL listed, suitable for wet locations.

Dimming Compatibility

Amerlux® Rook® fixtures are compatible with all major dimming protocols prevalent in the United States. Please see below for general compatibilities and wiring diagrams. Amerlux recommends testing your unique dimming configuration as the exact full configuration (*Dimmer, Fixture Quantity, Voltage, etc*) may affect dimming performance.

--- NOTE: INFORMATION BELOW IS FOR WIRED DIMMERS ONLY. FOR WIRELESS DIMMERS, CONSULT FACTORY ---

TRIAC (Forward Phase) DIMMING (Standard) or ELV - Electronic Low Voltage (Reverse Phase) DIMMING (Standard)

Notes:

- TRIAC/ELV dimming at 120V only (dimming to 1%)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements per dimming manufacturer

TRIAC or ELV Wiring Diagram

* Pink & Purple wires are not used for TRIAC/ELV dimmer.

0-10V - DIMMING (-0-10V Option)

Integrates into a variety of building management and daylighting controls

Notes:

- 0-10V dimming at 120V or 277V* (dimming to 2%)
- Requires interface to turn off power to driver
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!

0-10V Wiring Diagram

Notes:

* Driver is 277VAC dimmable with appropriate dimmer (*by others*). All provided wiring diagrams show 120VAC wiring colors and method. Please refer to 277VAC dimmer installation instructions for 277VAC wiring diagrams.

† The absence of a dimmer from the lists above does not imply incompatibility. Please consult factory for compatibility inquiries.
