

# Amerlux's Rook 250, Rook X Extend Lighting Allure Inside, Then Out

*New Interior Pendant, Exterior Wall Mount Seamlessly Blend Indoor, Outdoor Designs*

**OAKLAND, N.J. – July 12, 2022** – [Amerlux](#) announced today that it has added two new members to its stunning Rook family of aluminum pendants and wall mounts, including an exterior architectural wall mount that allows designers and architects to create a sleek, uniform design from the inside out.

The [Rook X](#), an exterior wall-mount cylinder with a 2.7-inch aperture, and the [Rook 250](#), an interior pendant with a 2.5-inch aperture, continue the Rook product family's heritage of translating the control, performance and comfort of Amerlux's award-winning downlights into sophisticated new formats.

“Ideal choices for commercial, retail, hospitality and high-end residential applications, the [Rook X](#) and [Rook 250](#) ensure a sleek, uniform composition for nearly every space—starting inside, finishing out,” said Bill Plageman, Amerlux's VP of Marketing. “The [Rook 250](#) spectacularly delivers another option for delivering control and output in balance inside, while the [Rook X](#)'s weather-proof capabilities take the family someplace it has never been before: outside.”

## **Rook X Exterior Wall Mount**

The clean-styling [Rook X](#) exterior wall mount cylinder offers a 2.7-inch aperture in dual output (up/down light) or single-sided (up-light or down-light only) configuration. Domestically engineered with precision-machined extruded aluminum housing and five elegant, discrete finishes, the [Rook X](#) blends in gorgeously with any architectural façade and adds beauty, character and focus to modern and traditional outdoor structures.

Facility managers applaud the [Rook X](#) because it has seamless sides and no visible hardware, ensuring water-tight, long-lasting durability in all weather conditions. Contractors also love the

exterior wall-mount because it has an integral driver that simplifies installation and a thin diecast backplate that keeps the fixture snug against the wall.

Various optical accessories, beam shaping films and a hexcell louver can be changed or added in the field. In addition, a range of color temperatures (i.e., 2700K to 4000K) ensures it's a pleasant addition to any landscaping environment.

## **Rook 250 Interior Round Pendant**

The [Rook 250 interior round pendant](#) is a beautiful, slender solution ideal for open-ceiling applications where downlight performance is required in a more strikingly decorative manner.

Maximizing a 2.5-inch aperture, the Rook 250 complements Amerlux's line of pendant cylinder solutions with a constant aperture appearance, quiet ceiling design and optical performance in two distinct sizes: full (9-inch height) and mini (just under 4½-inch in height).

Built with integral drivers, the fixture offers quick and easy installation and can control direct and indirect lighting separately. Single-point suspension and surface and single-circuit track mounting options are available, as are several performance outputs and finishes that stir and grab attention.

Meanwhile, the [Rook 250 Mini Frame Mount](#) offers a remote driver in the most convenient location: above the fixture. Perfect for a trimless, clean and minimal aesthetic, the Rook 250 Mini Frame Mount allows for more driver options and accommodates EM battery packs.

## **More Rook Options, More Memorable Experiences**

Architects and designers don't have to go far to find other opportunities to add to their spaces using Rook's complete family of interior and exterior lighting solutions:

- Amerlux's [Rook 3.5" Round Pendant](#)
- Amerlux's [Rook 3.5" Round Pendant with Dim-To-Warm](#)
- Amerlux's [Rook 3.5" Square Pendant](#)
- Amerlux's [Rook 3.5" Square Pendant with Dim-To-Warm](#)
- Amerlux's [Rook 4.75" Round Pendant](#)
- Amerlux's Rook 3.5" [Round](#) and [Square](#) Interior Wall Mounts
