

## **Let your vision take shape with new Pendant Multiples by Amerlux®**

Oakland, NJ --- Amerlux® adds curved and straight Pendant Multiples offering endless design possibilities that deliver multiple beams of light from a single housing. The Curved Pendant Multiple is available with color changing uplight to add visual excitement to any space. Both pendant and surface mount versions allow accent heads to adjust from fully recessed to semi-recessed in the field.

“Let your vision take shape with our new Pendant Multiples,” explained Amerlux CEO/President Chuck Campagna. “Open up a world of design possibilities for commercial, retail and hospitality spaces when you choose from this versatile range of styles, features and configurations to set the right scene in any environment.”

Amerlux Pendant Multiples are the latest addition to the popular, high-performing Hornet® HP and Cylindrix® III Mini LED families. Expand your design horizons with curved and straight configurations, mixing and matching the fixtures to create visual patterns in any ceiling or non-ceiling designs. Add in a clean look, easy maintenance, CBCP-focused optics, and industry-leading output, and pendant multiples are perfectly poised to bring your vision to light.

Hornet HP LED Pendant Multiples replace conventional sources such as MR16 or metal halide fixtures with a more efficient, long life energy source that provides better-maintained and more secure lumens and consistent color rendering, in creative fashion. Fully dimmable to less than five percent, beams are easily field changed with optical film while LED heads and drivers are fully replaceable. Energy Star® rated, Hornet HP fixtures provide excellent control, color and performance and a variety of color temperatures, CRI options and beam spreads—Narrow Spot, Spot, Narrow Flood, Medium Flood, Flood, and Wide Flood. Hornet

HP uses an electronic constant current LED driver and ELV or Triac dimming, which ensures compatibility with existing dimming systems. Trim finishes are offered in White Texture, Black Texture and Silver Texture. An assortment of options and accessories are available.

Cylindrix III Mini LED Pendant Multiples are powerful, compact die-cast luminaires engineered to enhance your design aesthetics with a variety of wattages, color temperatures, and beam spreads down to 8 degrees. Tiny, passively cooled LED heads, with full dimming capacity, deliver brilliant colors and crispest whites utilizing a patent pending, field changeable TIR optical system that delivers superior efficacy and lumen output, extraordinary aesthetics and the best light possible in every metric. The diminutive cylindrical profile possesses a clean architectural styling to complement today's interiors and a deeply recessed light source that enhances visual comfort and control. Triac and ELV dimming are standard on universal systems ranging from 120-277V. A broad range of lighting control accessories are accepted, including snoots, linear spread and beam softening lenses, cross blades and louvers. Black Textured, White Textured and Silver Textured finishes are standard. Custom finishes are available.

### **About Amerlux LLC**

Light is a visual force that surrounds us all, affecting every moment and aspect of our lives. Amerlux® understands the lumen/human connection and offers products that deliver innovative, creative solutions. Great lighting is so much more than harnessing watts and lumens. Done right, it guides our entire experience of life.

Amerlux speaks the language of light for design and construction professionals around the world by manufacturing a broad array of optically superior, energy efficient lighting solutions for the retail, supermarket, hospitality, commercial and exterior lighting markets. Amerlux products and services include track lighting, recessed downlighting and multiples, pendants, linear systems, and custom lighting solutions, as well as support for energy reduction plans that can be used as a guide to state, city and local utility rebate programs for maximum energy savings and utility incentives. The company's domestic and international clients receive the support of Amerlux's highly trained specification sales force, as well as expert service from initial design to on-time delivery made possible by

strategically located manufacturing, warehousing and shipping locations. Discover how the right light makes all the difference at Amerlux.
